Key Functions & Features

Context Menu

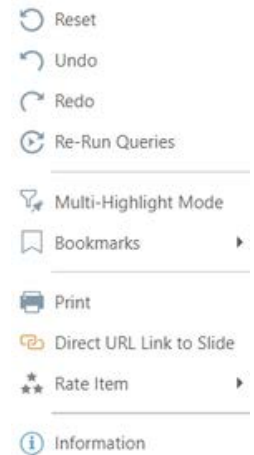

You can use the **right-click context menus** to interact with discoveries on your presentation and perform further analysis of your data on-the-fly. **Right-clicking on the Discovery** (visual graphic or chart) lets you explore your data more fully than you could do in a PDF or other non-interactive format.

The **right-click context menus** always show functionality **related to the selected item**. As an example, the context menu that you see when you right-click a discovery differs from that of a legend or slicer.

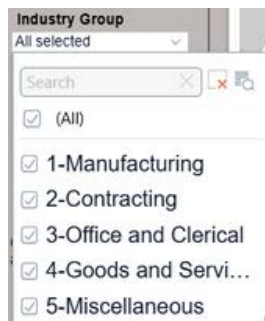

Interactions

You can **right-click the canvas** (gray area surrounding Discovery) to access both the Main Navigation functions as well as additional functions that enable editing, sharing, printing, and exporting.

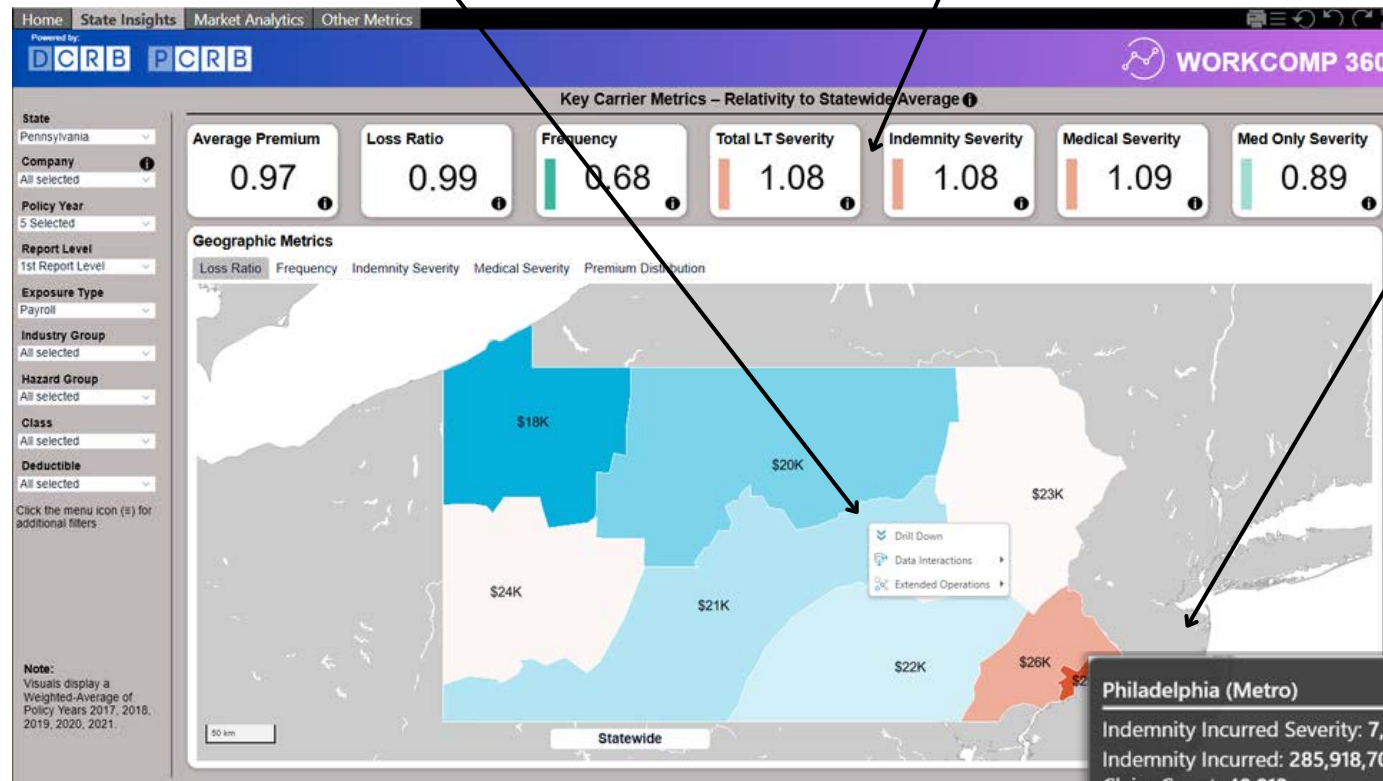

Filtering

The **drop-down boxes to the right** allow you to select one or more elements to filter the current query.

When multiple items are selected, they are combined in the filter. For longer lists, a scroll bar will appear to assist with navigation.

Tooltip

You can **hover over various data points of the Discovery** to access more information known as a 'Tooltip.'

Unlocking Data and More Information

More Information

Click on the black circle with "i" inside to view more information on the visual.

Data Color Patterns

Solid color bar represents carrier data, while checkered bar represents Statewide data.

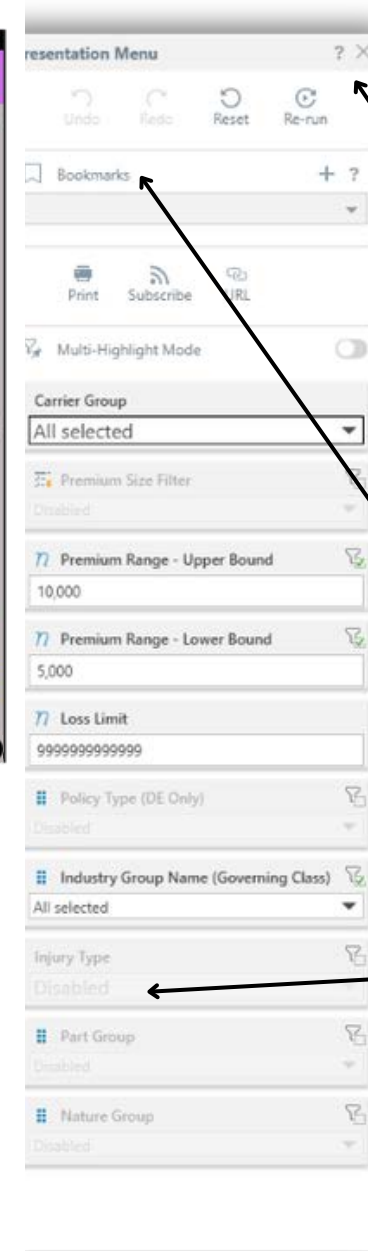

Help / User Guide

Click on the black circle with question mark to access help via our User Guide.

Presentation Menu

You can click the hamburger icon in the presentation to access advanced options:

- Refresh
- Bookmark
- Print
- Subscribe
- Edit

Pyramid Help

Click the question marks within the presentation menu for Pyramid-provided help.

Bookmark

Create, edit, and apply bookmarks to this presentation to quickly return to your custom filtered views.

Enable & Disable Filters

Click check box to enable or disable filters.
